

1 **Amendment to the Specification**

2 **In the Specification:**

3 Please amend the specification as follows:

4 On Page 12, the paragraph beginning at line 1 should be replaced with the following.

5
6 The term Hyper Text Transport Protocol (HTTP) refers to the communications protocol used
7 to connect to servers on the World Wide Web. Its primary function is to establish a connection with
8 a Web server and transmit HTML pages to the client browser. Addresses of Web sites begin with an
9 **http://** or an **https://** prefix; however, Web browsers typically default to the HTTP protocol. For
10 example, typing "www.mysite.com" followed by the characters required to connect with a desired
11 uniform resource locator (URL) produces the same effect as typing "http://www.mysite.com"
12 followed by "www" followed by the characters required to connect with the desired URL.
